

Bring a smarter future into focus with the Confidence to Operate

Edge to enterprise operations

Unique user experience across AVEVA's broad range of proven applications: from HMI/SCADA, collaboration, and reporting, to manufacturing execution management, and predictive analytics.

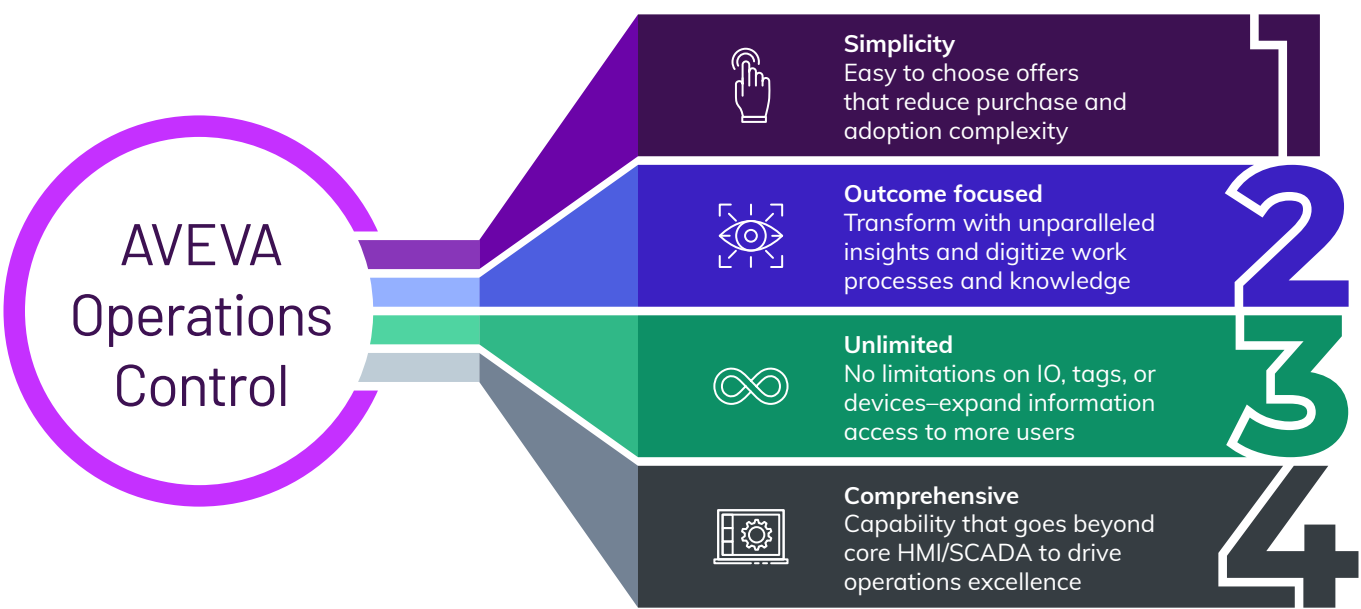

Hybrid IIoT

Supporting a mix of cloud-based, on premise and hybrid applications gives operational and business users the flexibility to use best-of-breed tools designed for their use case.

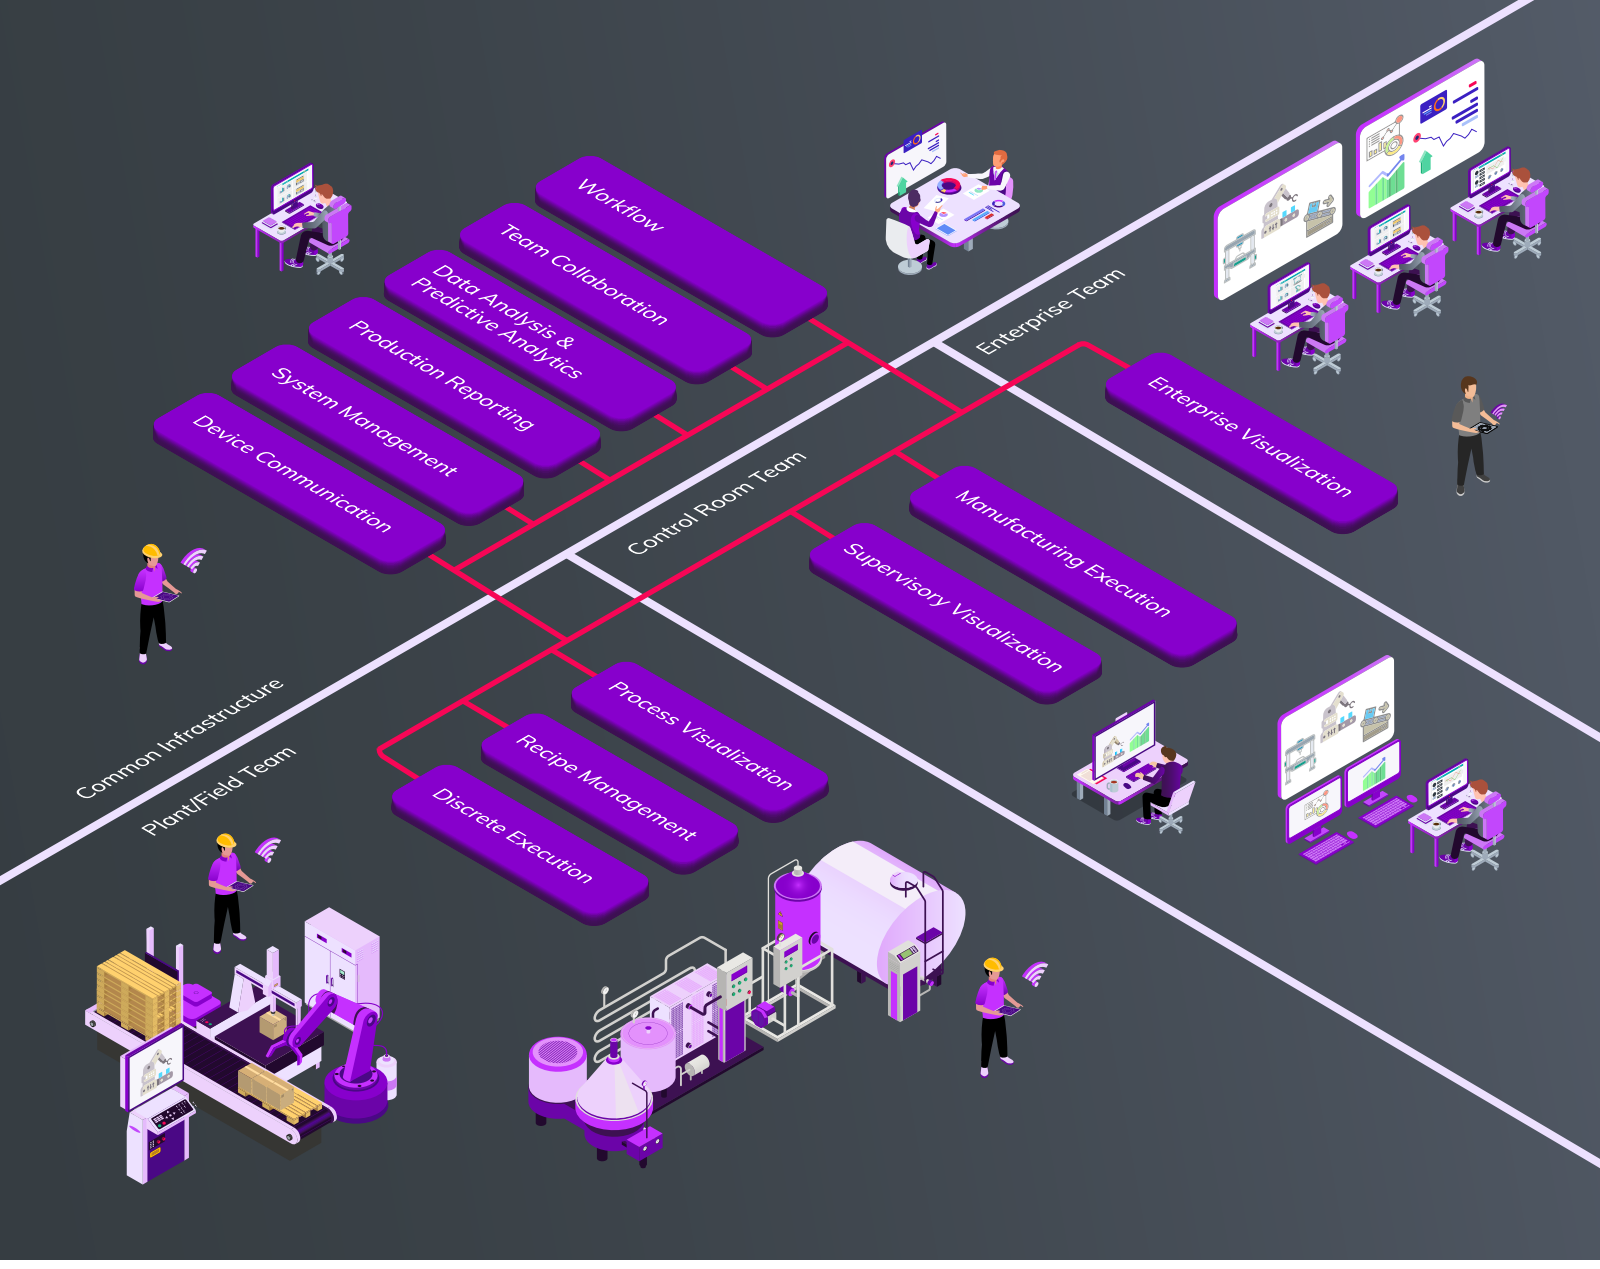

Right licensing

Market's first and only edge to enterprise subscription model enabling the portfolio as a service with unlimited scalability, unlimited IO/tags and unlimited clients.

Achieve Operational Excellence from edge to enterprise

Discover how AVEVA empowers decision-makers at every level, from frontline operators to executive level decision-makers

Benefits gained from using AVEVA Operations Control

Empower connected workers

Empower stakeholders to react effectively to different scenarios and allows them to identify opportunities of improvement

Improve operational effectiveness

Various lean tools to work towards elimination of waste like downtime, motion and waiting time and non-value added data handling

Increase asset reliability

Over and under maintenance of assets greatly affects profitability and increases risk of asset failure

Reduction in operating costs

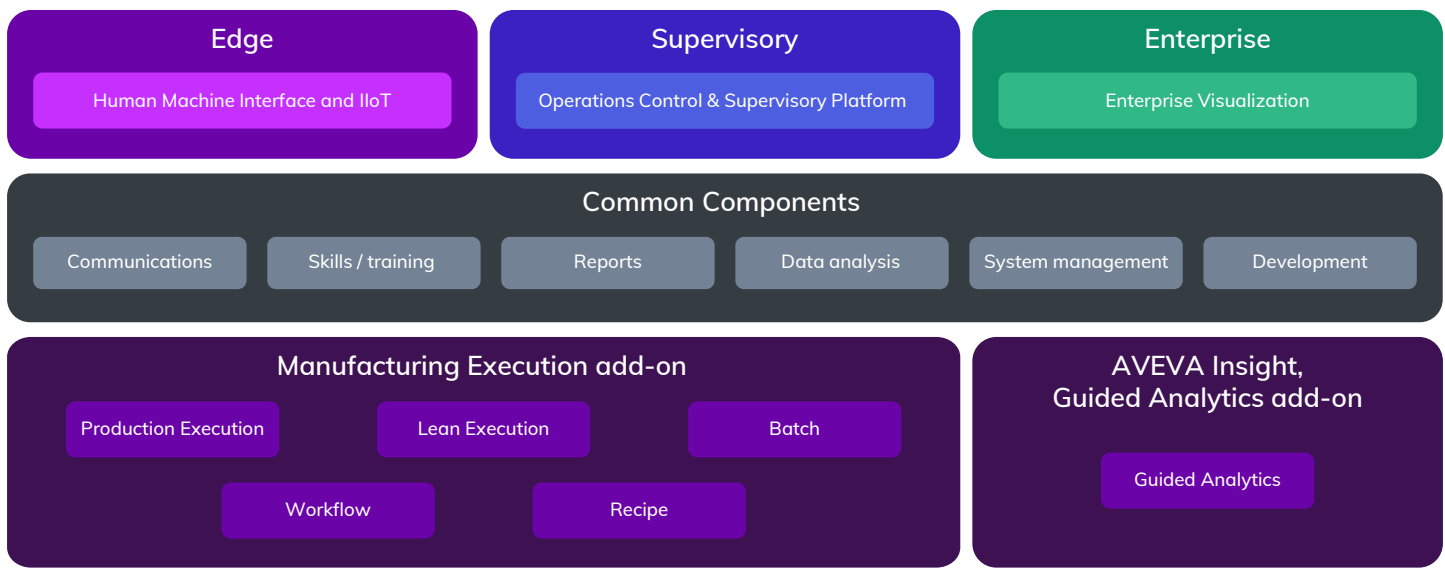

Increased productivity

Increased yield

Shortened time to decision

AVEVA Operations Control packages
